

"Quality Made, Built To Last"

Walt,
I want the best security
at our dock. Lets get the
Guardian 3-in-1 Seal.
Jeff

SAFE & SOUND

- SEALS AGAINST TRUCK
- SEALS AGAINST BUILDING
- SEAL DETERS AGAINST THEFT
- SEALS AGAINST ENERGY LOSS
- SEAL OUT... WIND, RAIN, SNOW, DUST AND FUMES

GUARDIAN 3-in-1 DOR-SEAL SYSTEM

NOT YOUR ORDINARY DOCK SEAL

INNOVATIVE NEW DESIGN! PROTECTS EMPLOYEES & DISCOURAGE PILERAGE

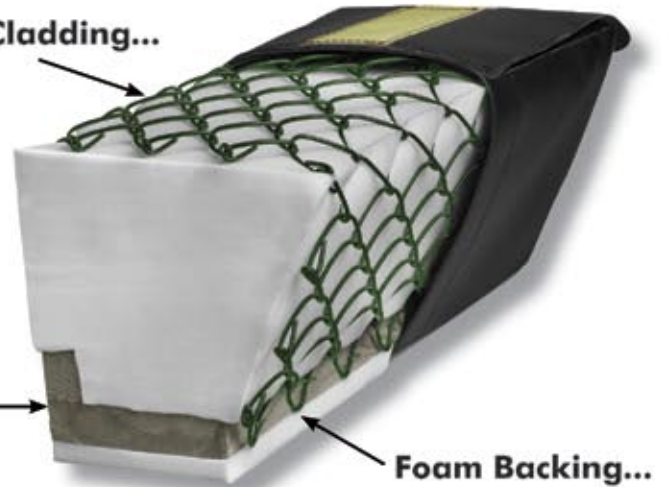

Chalfant has pioneered the development of dock seal technology that protects buildings, products and employees from the entry of wind, water, snow, dust and dock fumes, which results can be seen in energy savings. And now, with the patent pending **Guardian 3-in-1 Dor-Seal System**, we have added another important benefit; **security**.

The **Guardian 3-1 Dor-Seal System** unique **triple duty design**, keeps conditioned air and packages in and keeps people out. Let your unattended dock be a safe experience against thieves, who can cut through an ordinary foam core of a dock seal. The **Guardian 3-in-1 Dor-Seal System** can prevent unauthorized entry and is available with three basic selectable features;

Chain-Link Cladding...

Mounting Plate...

Foam Backing...

1. Chain-Link Cladding...

Vinyl coated chain-link structure surrounds the foam padding to keep thieves from cutting through the pad to gain access to the trailer and your facility. Deter; intrusion, vandalism, product tampering, theft.

2. Unique Mounting Plate...

Heavy-duty wood or optional steel substructure lends stability and rigidity to the dock seal and provides a strong, secure connection to the mounting brackets. No more damaging building ribs when installing dock seal. Recommended for metal ribbed panel walls.

3. Foam Backing...

Soft foam conforms to irregularities of building walls, providing an air and water-tight seal between the dock pad and the building wall.

4. Two-Year Warranty...

The Guardian 3-1 Dor-Seal System with all three basic features, carries a standard two-year warranty

Quality Construction

Chalfant dock seals are factory assembled and mounted to kiln dried 2" wood and feature "Weathertight Construction" completely encased inside of the pad cover to protect it from abuse and outside elements. Galvanized steel mounting brackets are available in various sizes for different types of building applications and types of pads. All brackets are bolted to the dock door frame. The Dor-Seal pads are positioned in the brackets and attached with lag bolts providing a secure connection to the building and allows quick removal of old units and install of new.
