

Loading Dock Communication Lights System

Increase Dock Safety

Provide enhanced dock safety by providing inside and outside positive visual communication between the dock personnel and the truck driver, with universal red and green light display. The system includes two light communication systems - one outside on the loading dock wall and one inside the building. When the truck is properly restrained at the loading dock, the dock personnel activates toggle switch mounted on the inside loading dock communication light, changing the inside light to green and the outside light to flashing red. This tells the truck driver not to move during the loading/unloading process. After the truck is loaded/unloaded dock personnel release the restraint, then simply toggle the switch back, changing the inside light to red and the outside light to green, which then indicates to the truck driver he is free to move the vehicle.

- Available with long life energy efficient LED's or economical incandescent signal lamps.
- Durable plastic housing (in safety yellow or black) will not rust, pit or corrode.
- Integral eyebrow-type sun visors provide extended visibility while shielding the lights from rain and snow.
- Shallow depth of unit reduces risk of damage and convenient mounting holes provide simple installation.
- UL & cUL Listed - Available in 12VDC, 24VDC & 115VAC.

Available With Super Bright LED Signals

- Reduce energy costs by 90% compared to incandescent lights.
- No filament means longer life.
- Requires no maintenance.
- Three year limited warranty on LED

Dock Communication Light System

TECHNICAL SPECIFICATIONS

Housing.....Safety Yellow or Black Polypropylene
 Power Source 12 or 24 volt DC operation or 115 volt AC operation
 Lens Diameter.....4.25 inches
 Dimensions..... 11.75" H x 6.75" W x 3.75" D
 Shipping Weight.....2 lbs. per unit

Available with dock warning signs
